Often, the most powerful representations of the human face are ethereal ones. Fashion it from glass and you bring even greater interest to the visage. Our Glass Face Green Wall Tile, in our Dann Foley Collection, holds an elongated, abstract rendering of the human face that our talented artisans have made from luminous glass. This is one of our products that will look striking on its own and even more so when grouped on a wall. We also offer tiles in this collection in turquoise, clear, and amber. Each of these reflects the ethos that Phillips Collection personifies: modern organic.
