Recycled wood and iron fuse together in our Industrial Loft collection to create eclectic pieces of furniture. Crafted exclusively from reclaimed materials, each piece in this unique collection features fine details such as adjustable hand cranks for a vintage look that blends art and function. This hand-crafted drafting desk has a reclaimed teak wood top featuring clean edges, and the water-based catalyzed natural finish on the wood offers durability while showcasing the natural grain of the wood. Affixed to either end of the base of the table top are two rods that fit into the recycled iron base where the industrial crank mechanism is connected to an antique styled handle, allowing the table's top to be horizontal or slanted up to a 90 degree angle; whatever height works best for your needs. The sleek, hand-forged iron base in gun metal finish creates a beautiful fusion of natural and industrial elements with the teak wood top. This drafting desk requires assembly, and with eco-friendly materials of the finest quality, it will be an effortless addition to any home.
