Renovate your dining room with the minimalist chic of the beautiful pieces from the Loft collection. The faux live-edge and deep walnut finish of the pieces in this collection is a warm contrast to the sleek perfection of their steel bases. Each Loft piece is constructed from hand-selected premium acacia wood, offering a much higher quality look and feel. Combining organic silhouettes with modern details for a casual and transitional style, this hand-crafted faux live edge dining table is cut from a thick acacia wood slab featuring uneven edges and butterfly joinery detailing. The catalyzed water-based dark walnut finish on the wood creates an amazing luminosity that evokes beauty from every angle while also being durable for daily use. The table's top rests atop two reclaimed iron U-shaped legs in antique zinc finish, creating a fusion of natural and industrial elements. This table requires assembly and with materials of the finest quality, it will be an effortless addition to any home.
