Rather than twist yourself in knots over the perfect coffee table for the contemporary or industrial chic living room, tap the Phillips Collection Trifoil Liquid Silver Coffee Table for the job. Made of composite, the knot coffee table has been finished in liquid silver to look like metal. Given asymmetrical and organically shaped elements add interest to a space, this table, which comes with the glass top, will be a fascinating introduction. We also offer the Trifoil in a bronze finish. Both of these reflect the ethos that the Phillips Collection personifies: modern organic.
