Any designer will affirm the importance of texture in a space, which makes the Ripple family of furnishings a favorite. The Ripple Silver Coffee Table is a luminous round cocktail table made of composite in a silver leaf finish. The rings that are pressed into its surface provide the design detail that adds a hint of texture to a space. We also offer two sets of four wall disks, a round mirror, a metal coffee table, and a side table in this family of products. This silver coffee table reflects the ethos that Phillips Collection personifies: modern organic.
