The CASPER dining table is the perfect solution to practical dining in a smaller space. The hide away leaf self stores under one end of the table that easily pulls out to extend an additional 20" inches! Turning a table for four into six with ease. The practical part is the surface of the table. We laminate a ceramic sheet onto glass which makes the surface scratch proof, stain proof and food safe. The CASPER features ceramic that looks and feels like polished concrete and a powder coated grey leg creating an industrial, monochromatic, sleek look.
