The Cast Naturals Collection highlights our skills at taking an innovative material and making it feel as if it sprang from nature. The Copse Small Gold Stool is made of composite that has been molded to look like a piece of harvested wood it took nature ions to create, then finished in gold leaf. The advantage of having a stool made from this durable material is that it will long outlast its natural counterparts pulled from the forest floor. This gold root stool is the perfect representation of the Phillips Collection ethos: modern organic.
