Set like a gem in its cubed frame, the Inverted Pyramid Small Side Table is an example of how beautifully Phillips Collection takes raw pieces of wood and pairs them with clean-lined metal frames to make them contemporary jewels in a space. Made of finely sanded inverted pyramids of wood in a gray stone finish, the top slides into a metal frame in a lush black finish. The size of this piece makes it perfect as a drinks table, as well. We also offer it in a larger size. Each of these reflects the ethos that we personify: modern organic.
