Greenington's high performance Rowan Jr. media cabinet allows easy remote access to your media, yet keeps components hidden out of view behind three beautiful louvered doors. The louvered design allows the infrared light to reach your remote-controlled devices inside. Easy to use, the back of the media cabinet is as accessible as the front, via a one piece ventilated rear panel that can be completely removed for clear access to your cables, wiring and media components. Generous flow thru ventilation for heat control. Ships fully assembled. The sleek modern design and simple clean lines of Rowan features a craftsman-built frame made from solid bamboo, lacquered in a matte black finish with solid Amber bamboo doors. Environmentally safe, Amber is not a surface stain, the color is the result of an innovative caramelization process using heat, steam, and pressure to transform the solid bamboo material into Amber's splendid array of colors. Variation in grain and color enrich the natural beauty of bamboo furniture and make each piece unique. Slight differences in bamboo shade colors are signs that the furniture has been crafted from solid bamboo and is considered a benchmark of quality. Discover the expert craftsmanship packed into each piece of Greenington bamboo furniture, made using a renewable resource harvested from fully sustainable and rapidly growing forests.
