Made of glass with a turquoise sheen, the Bubble Glass Coffee Table is stamped with a flowing pattern that is created when molten glass is laid onto a surface covered with stones. The rocks create varying sizes of impressions that bring this glass coffee table its bubbly personality. The stainless-steel frame that supports the glass makes this a seamless design. A design aspect of note is how the bumpy surface of the bottom layer creates a textural feel even though the top surface is smooth. This contemporary coffee table perfectly reflects the ethos that the Phillips Collection personifies: modern organic. We offer a number of furnishings in the Bubble Glass family of products, including a console table.
